**The Winfield Scott Stratton Collection** is without a doubt one of the most important mining archives in the United States. Stratton was the first millionaire in the Cripple Creek Mining District and proved to be a smart, ambitious head of his mining company.

### **Winfield Scott Stratton**

Born in Jeffersonville, Indiana, in 1844, Stratton arrived in Colorado Springs while the future city was yet an infant. A gifted carpenter, Stratton soon earned a comfortable living building houses. He was also interested in mining. Stratton took some courses in basic mining techniques and throughout most summers, roamed the Rockies searching for gold and silver. His efforts were in vain until 1891, when he reached the new Cripple Creek Mining District only two months after the district had been formed.

On July 4, 1891, Stratton staked two claims—the Independence and Washington—on the south slope of Battle Mountain. Initial assays showed that there was gold in the Independence, but subsequent assays did not fare as well, so Stratton optioned the mine to another prospector. As he was cleaning out the mine, Stratton discovered that there was a rich vein of ore he had overlooked. He disguised the vein and sweated through the month-long option that was given back to him as worthless.

Stratton got to work and within two years the Independence was steadily producing gold that earned him a continuing profit. By mid-1898, Stratton had taken close to \$4 million from the Independence. He also owned substantial stock in the adjacent Portland Gold Mining Company and was widely regarded as a shrewd mine owner.

In later 1898, one of Stratton’s acquaintances convinced him to listen to an offer from a British firm that wanted to purchase the Independence. After lengthy negotiations, Stratton sold the Independence in May 1899 to the Venture Corporation for \$11 million. He received \$10 million and Verner Z. Reed, the man who brokered the deal, was rewarded with \$1 million for his successful negotiations.

By the time Stratton sold the Independence, he had purchased some mines in the district that might prove useful for his plans. Now, with millions in his bank account, Stratton aggressively purchased mines on Bull and Globe Hills. He developed a theory that the veins of gold seemingly pointed to a huge mother lode deep within the district—his now-famous “Bowl of Gold” theory. The mines he purchased had veins that pointed in the same direction where that bonanza might be.

In the fall of 1901, Stratton created the Stratton Cripple Creek Mining & Development Company to manage his growing mining empire. However, Stratton died in 1902 and never realized his dream of finding that bowl of gold. His managers continued to develop the best mines in the company but in 1904 decided to lease most of the property and receive royalties. Stratton’s will specified that the bulk of his fortune was to be used to create the Myron Stratton Home. Named after his father, the home would be a haven for orphans and other people unable to care for themselves. Profits from the Stratton CCM&D Company would go to the home. There were

numerous attacks on Stratton's will and the home did not open until 1913.

Stratton's company continued to lease its properties, at first with some success but as time went on the quality and amount of gold ore declined and leasing became more and more difficult. Profits declined during World War I, rose again slightly in the 1920s and 1930s, but World War II spelled the end of any profits. After the war, there were very few leases and the Myron Stratton Home was continually loaning money so that the company could pay its taxes and few employees. The last entries in the cash books of the company date to the mid-1970s. The company is technically still in existence as part of the Myron Stratton Home and continues to receive royalties from the Cripple Creek & Victor Gold Mining Company, a Newmont subsidiary that continues to mine in the Cripple Creek Mining District.

### **The Stratton Collection**

The collection of papers was moved several times before being stored in the Myron Stratton Home. As a result, the original order of the collection was lost. In 1997-1998, the Home entered negotiations with both the Western Museum of Mining & Industry and Pioneers Museum to donate the Stratton Collection so it could be better cared for. In August 1999, the Home donated Stratton's mining papers—essentially the records of the Stratton CCM&D Company—to WMMI, with his personal papers and records of the Home going to the Pioneers Museum.

In order to process the Stratton Collection, WMMI obtained generous grants from the Home, Gates Family Foundation, and the H. Chase Stone Trust. Sister Sharron Uhler was hired as the archivist in charge of organizing the collection. During the eighteen months that the project lasted, Sister Uhler was assisted by Suzanne Segady, Sister Ann Walter, Sister Mary Jane Vigil, and R. Michael Booker. After Sister Uhler and her team completed work on the collection, a 246-page guide was completed in October 2002. The maps and ledgers were given catalog numbers that began with 1999.30. A few artifacts and some photographs and books were part of this donation; the books were integrated into the museum library while the photographs and artifacts were cataloged.

Museum staff and personnel constructed an Archives Room in the museum's Collections Building to house the Stratton material.

The Stratton Collection was consulted by authors of two museum publications, *A Concise History of Mine Hoisting from its Earliest Beginnings through Winfield Scott Stratton's Independence Hoist* (2002) and *The World's Greatest Gold Camp: An Introduction to the History of the Cripple Creek & Victor Mining District* (2010). Otherwise, the collection seems to have been rarely used by researchers since that time.

In the fall of 2012, Dr. Richard A. Sauers became the museum's director. A professional historian, Sauers soon recognized the importance of the Stratton Collection. He closely examined the collection and realized that it needed to be reorganized to make it more accessible to potential researchers. Since the collection's initial organization, the museum had received several boxes of additional papers from the Pioneers Museum as that repository organized its own Stratton

collection and discovered mining-related documents that were transferred to WMMI. These additional boxes had never been processed and integrated into WMMI's Stratton Collection. Also, roughly 1,000 Stratton maps had been received at WMMI after 2002; these maps were described on catalog sheets but had not been summarized for inclusion in a future guide.

With the assistance of volunteers and interns (Kaitlyn McGann, Elle Markley, Anna Kennedy), Sauers began the task of processing the additional boxes of Stratton papers and deciding where they would go in a newly-reorganized collection. Work on the reorganization intensified in 2019 and was completed in early 2021. This new 310-page guide to the collection is the result. All the maps are included, and each map has a simple, four-line brief description to assist researchers in determining which maps they might want to view in person.

Work on the maps was pushed because the geologists at the Cripple Creek & Victor Gold Mining Company visited the archives in early 2020 and realized that many of the Stratton maps would be useful in their project to create a 3-D underground map of the Cripple Creek Mining District. The company paid to have hundreds of the maps digitized. These maps are marked by asterisks in that section of the guide.

### **Organization of the Collection**

#### Series 1: Stratton Cripple Creek Mining & Development Company

##### General Records (1 box)

This box includes annual reports, Board of Trustees Minutes, and other records associated with the Stratton CCM&D Company.

##### Correspondence (9 boxes)

Included is employee (primarily the lease managers) correspondence, as well as general correspondence that is divided into annual folders, followed by a section of folders containing correspondence from selected individuals and organizations.

##### Insurance and Taxes (2 boxes)

The insurance includes employee, liability, fire, and general, together with state and workmen's compensation insurance. Most of the tax records are for the state of Colorado, with tax-related correspondence at the federal, state, and county levels.

##### Property (1 box)

The miscellaneous records here include lease and purchase options for the Stratton estate, property reports, and other related material.

##### Financial Records (29 boxes)

Records include Cancelled Checks (12 boxes), Deposit Books (1 box), Checkbook Stubs (8 boxes), Bank Statements & Deposit Slips (1 box), Financial Statements (4 boxes), and Invoices & Vouchers and Payrolls (3 boxes). The most important material here are the four boxes of monthly and annual financial statements that range from 1900-1970.

#### Leasing (12 boxes)

Included here are dump permits, lease agreements, lessee ore production statements, prospecting licenses, and lessee reports. The lessee reports are standard Stratton company forms that were filled out by lessees during the years of the leasing program (began in 1904).

#### Ore Processing (19 boxes)

This section includes Advice of Shipment records, a standardized form created by the Stratton company; Ore Settlement Reports (forms created by the milling companies that purchased gold); and Ore Shipment Reports, a Stratton company standardized form.

#### Lessee Card Files

Included in the donation were two wooden card files that contain cards for lessees of the Stratton property, dated from 1904 to at least 1916. One file is for Globe Hill, the other for Bull Hill.

#### Series 2: General Records

##### Lawsuits (7 boxes)

The lawsuits include a large number of suits involving dozens of mining companies, including many non-Stratton companies.

##### Mines and Mining Companies, Cripple Creek (20 boxes)

The companies and lode mining claims in this section consist of Stratton's companies as well as a wide range of Cripple Creek properties. The largest amount of documents relate to the Abe Lincoln Mine, American Eagles Mine, Arcadia Consolidated Mining Company, Consolidated Nighthawk & Nightingale Gold Mining Company, Cripple Creek Drainage & Tunnel Company, Delmonico Lode Mining Claim, Granite Hill Mining & Milling Company, Independence Mine, Joe Dandy Mining Company, John A. Logan Mine, Longfellow Mining Company, Matoa Gold Mining Company, Orpha May Mine, Portland Gold Mining Company, Reno Mining & Milling Company, Sacramento Gold Mining & Milling Company, Six Points Gold Mining Company, Starr King Gold Mining Company, Stratton's Independence, Temomj Mining & Milling Company, Union Gold Mining Company, and the Zenobia Gold Mining Company.

##### Non-Cripple Creek Mining Properties (2 boxes)

Of importance are the records of the Brewster Coal Mine, Stratton's coal source located near Florence, Fremont County, Colorado. Records of the Zapato Mining & Milling Company, located in Costilla County, Colorado, are also preserved in this section.

##### Miscellaneous Documents (1 small box)

The records here include articles, blank documents, and unidentified company records and agreements.

### Series 3: Ledgers

The 373 items in this section include ledgers from a wide range of mining companies, and include stock registers, ore records, accounts, cash books, board minutes, expenses, correspondence, and vouchers.

### Series 4: Maps

There are 1,588 numbered maps in the Stratton Collection. They range in number from 577 to 2165. The maps are primarily of Cripple Creek mines; hundreds of them were used as exhibits in the numerous lawsuits represented in the collection. Some of the maps are reverse-image copies and mirror their originals. Most of the maps are flat, while the larger ones remain rolled because of storage issues. During the winter of 2020-2021, Docutek, a Denver firm, digitized hundreds of maps. The Cripple Creek & Victor Gold Mining Company generously funded the maps digitization. Digitized maps have an asterisk (\*) after the catalog number.

Each map has a four-line description:

1. title
2. type of map—paper, paper on linen, blueline, etc., followed by name of the maker and a date if known, followed by size
3. brief description of what the map contains
4. location of the map—drawer number, rolled, or on top of cabinet. A few maps have been framed for exhibit purposes and are noted as such.

In addition to the above material, there are two boxes with 68 folders of Mining Exchange Reports from 1905-1918. The two sets of numbers in these daily reports are possibly stock quotes for different mines but without any context, interpretation is difficult at best.

### **Accessing the Collection**

The Stratton Collection is housed in the museum's Collections Building, a mile from the main campus. Researchers wishing to use the collection should first consult this guide to determine what they would like to see, then make an appointment with the museum curator. Depending on the amount of material to be used, a visitor may work either in the Museum Library (located in the main building) or the Archives Room (a mile from campus).

Researchers may request copies of material if the pages are in copyable condition. There is a fee for this service. Permission is needed from the curator (or other staff member if

the curator is not available) to use hand-held devices to photograph documents.

As this guide was being completed, the museum began to seek grants to digitize the bulk of the Stratton Collection. This will take some time and will not include the cancelled checks, checkbook stubs, deposit slips, and bank statements. WMMI will make an announcement when the digitized version of the collection is available for research.

#### **Series 4: Maps**

The original map cataloging sheets contained numerous inconsistencies, omissions, and errors. We have tried to correct all of these in the four-line descriptions in this section.

The types of maps include the following:

Blackline: black lines drawn on white paper (similar to Paper on Linen maps)

Blueprint: an actual blueprint that consists of white lines drawn on blue paper

Oil Cloth: name given to a type of paper that feels “oily”

Paper: plain white paper generally with maps drawn with black ink

Paper on Linen: white paper backed by linen for greater strength and durability.

Generally the maps are drawn with black lines with other colors used for emphasis of certain areas or claims.

Sepia Reverse: a reverse image with white lines on brown paper

Whiteline: the material is drawn with white lines usually on blue paper

We have followed abbreviations used in many maps. Most of these abbreviations should be self-evident. The abbreviation MB stands for “mining claim boundaries.” The brief descriptions do not list all the mines visible on the maps. Any mistakes in type of map are made by the compilers of this guide. All maps marked by an asterisk (\*) have been digitized.
